

Responsible Use of Digital Technology Student Agreement

To prepare students to become good digital citizens, it is essential that they understand the responsible use of information and communication technologies. By using School District computers, technology resources, and networks, students and their parent/guardian agree to follow the expectations established by the Department of Education and Early Childhood Development, the District, the school, and school staff.

Provincial (EECD) Policy 311 outlines the minimum standards for the appropriate use of information and communication technologies in the public school system. The policy can be viewed on the Government of New Brunswick website at gnb.ca/en/topic/education-training/k-12/info-teachers/policies.html.

ASD-N Regulation 309 outlines district standards for the appropriate use of information and communication technologies. The policy can be viewed on the ASD-N website at asdn.nbed.ca/policies

Please note: In accordance with Policy 311, students may have supervised access to district-approved digital tools, including tools that incorporate Artificial Intelligence (AI) features, to support learning. These tools may collect limited information as outlined in their terms of use. Students will be reminded not to share personal, confidential, or sensitive information when using digital tools.

District-approved tools are reviewed for educational use and are subject to applicable privacy requirements.

Artificial Intelligence is increasingly integrated into technologies used every day, including learning platforms, office software, and search tools. As a result, students may encounter AI features while using approved educational technologies. If you have questions about the use of AI-supported tools in your child's learning environment, please contact your child's teacher or school administrator.

Both student and guardian must sign and return this form before access to computers, technology resources, and networks will be provided.

STUDENT

I understand that when using information and communication technologies at school, including computers, networks, the internet, software, AI-supported tools, and personal devices, I must follow the rules and responsibilities outlined in ASD-N Regulation 309 and EECD (GNB) Policy 311, including the Appendices.

I understand that if I do not follow these rules and responsibilities, I may lose my technology-related privileges and may be subject to additional disciplinary measures by the school or school district.

PARENT OR GUARDIAN

I have reviewed the rules and responsibilities outlined in ASD-N Regulation 309 and EECD (GNB) Policy 311, including the Appendices, with my child and understand that they are required to comply with these expectations. I authorize them to use technology-related resources at school and at home.

I understand that failure to follow these expectations may result in the loss of technology-related privileges and additional disciplinary measures by the school or school district.

Student information will be managed in accordance with applicable privacy legislation, Department of Education and Early Childhood Development policies, and District procedures.
